Super Cement Sanded is designed for use in the production of portland cement-based scratch and brown plaster in accordance with Section 2512 of the International Building Code or ASTM C926. It is an outstanding alternative when portland cement with Gibco or lime is specified.

- Super Cement Sanded is the premier alternative to field mixed portland cement-based scratch and brown plaster.
- Super Cement Sanded Scratch and Brown is a factory prepared blend of portland cement complying with ASTM C150. Sand and proprietary ingredients increase the workability and early strength of the product.

### FEATURES

- Factory Blended
- Proprietary Mixture
- Eliminates Lime
- Pumpable
- Less Alkali

### BENEFITS

- Batch to batch consistency - just add water
- Increased early strength and workability
- Cost savings and reduced inventory
- Increased productivity; reduced labor costs
- Reduced efflorescence

Super Cement Sanded is available in 80 lb and 3000 lb bulk sacks! It is designed for use in the production of portland cement-based scratch and brown plaster in accordance with Section 2512 of the International Building Code or ASTM C926. It is an outstanding alternative when portland cement with Gibco or lime is specified.
DIAMOND WALL
INSULATING STUCCO SYSTEM

FEATURES

Factory Blended
Durable
Fiber-Reinforced
Single Application
1 Hour Fire Rated

BENEFITS

Batch to batch consistency - just add water
Superior weathering properties
Reduced cracking
Reduced labor and scaffolding costs; schedule savings
Single family, multi-family, and commercial applications

Diamond Wall systems may be applied over the following substrates:

1. Wood or OSB
2. Exterior grade gypsum sheathing/glass mat reinforced gypsum sheathing
3. Fiber board
4. EPS, XEPS, or polyisocyanurate foam boards
5. Masonry
6. Poured-in-place and/or tilt-up concrete
7. Other approved cementitious boards
8. Open framing with lath (three coat application only)

- Diamond Wall provides the ideal base coat for the application of ColorTek stucco or AkroFlex and OmegaFlex Acrylic Finishes
- It exceeds ASTM C926 and may be used in three coat stucco applications
- For Diamond Wall one coat stucco systems refer to ICC-ES ESR1194 report

Available in 80 lb and 3000 lb bulk sacks!
