

INDUSTRY LEADING INNOVATION

Omega Products International is the leading stucco manufacturer in the United States. Omega’s extensive product lines include a family of acrylic finishes and coatings that create limitless design possibilities. All products are manufactured in the USA at our high-tech facilities, to our exacting quality standards. We use only the finest quality materials to ensure consistent and vibrant colors. Our products are backed by Omega’s industry-leading technical support and warranty plans, which has made Omega the professional’s choice for over 45 years.

Omega Products offers 63 standard colors for our family of acrylic-based textured finishes, primers, and coatings. Choose from these colors or allow our state-of-the-art color lab to create custom colors for your project. Provide us a color sample and we can match it.

Omega 100% acrylic-based finishes are designed to add texture and color to exterior and interior surfaces. These acrylic stucco products produce durable, weather-resistant finishes with superior performance in reducing color mottling, fading, efflorescence and mold growth. They incorporate Dirt Pickup Resistance (DPR) technology that minimizes dirt accumulation for easy maintenance. A wide variety of textures are possible from coarse to smooth depending on the finish choice and application method.

AkroFlex Finishes are designed for Omega’s commercial EIF systems. AkroFlex can also be applied over conventional and one-coat stucco systems. A wide range of finishes can be achieved with AkroFlex.

OmegaFlex Finishes are made for residential and commercial applications over conventional and one-coat stucco systems.* OmegaFlex comes in three main finishes: coarse, medium and fine.

AkroLastic Finishes are textured elastomeric finishes that provide greater elasticity and weather resistance over standard acrylic finishes. The increased elasticity allows it to bridge hairline cracks. AkroLastic is available in all AkroFlex standard textures.

FEATURES	BENEFITS
Integral Color	Lasting, uniform color that resists fading or discoloration; UV resistant
Crack Resistant	Acrylic polymers allow elongation without cracking
Moisture Resistant	Resists water penetration and color does not darken when wet
Easy Cleaning	Resists dirt accumulation
Vapor Permeable	Allows drying, while reducing the chance of mold and blistering
Easy Application	Pre-mixed with no additives required, cleans up with water

*Not for use with AkroFlex EIF Systems

ACRYLIC STUCCO COLOR & TEXTURE COLLECTION

MANUFACTURING A COMPLETE LINE OF WALL SYSTEMS & FINISHES

- ColorTek Stucco Finishes
- 100% Acrylic-Based Stucco Finishes
- Crack Isolation Systems
- Diamond Wall One Coat Stucco Systems
- Super Cement Three Coat Systems
- AkroFlex Exterior Insulation & Finish Systems (EIFS)
- Masonry Adhered Veneer Systems (MAVS)
- Water & Air Barrier Coatings
- EPS Foam Shape Coatings
- Performance Enhancing Admixtures
- Primers & Coatings
- Bonders, Cleaners & Sealers

PRIME IT . . . COLOR IT . . . SEAL IT

AkroFlex Base Primer is the primer for AkroFlex Finishes. It is formulated for use as a priming agent under all AkroFlex Finishes to promote bond strength, color consistency, and uniform suction, while increasing spreadability, water resistance and coverage of the AkroFlex Finish.

Omega RapidPrime is a primer for Omega acrylic finishes, coatings, and similar products designed to promote bond strength, color consistency, and uniform suction, while increasing water resistance and finish coverage. It can be applied without waiting for cement-based substrates to drop in pH, thus saving time and money.

Omega Color Bottle System is a factory blended, pre-mixed and pre-measured liquid coloring system. Provides an accurate method for adding pigments to AkroFlex and OmegaFlex finishes. Also use to tint Omega AkroFlex Primer, RapidPrime, AkroCoat, E44, RynoTex, and AkroLastic ProPlus.

AkroTique Pigmented Acrylic Sealer is designed to create a rustic, mottled finish similar to the timeless beauty of century old plaster offering an “Old World” look that does not take a lifetime to create. AkroTique also acts as a water-resistant sealer and can be applied over AkroFlex or OmegaFlex fine aggregate finishes.

OMEGA FLEX

ACRYLIC STUCCO
FOR CEMENT SUBSTRATES

OMEGAFLEX COARSE
OmegaFlex Coarse Finish utilizes approximately 1.5 mm quartz aggregates and can be troweled or floated to achieve a heavy sand finish.

OMEGAFLEX MEDIUM
OmegaFlex Medium Finish utilizes approximately 0.8 mm quartz aggregates and can be troweled or floated to achieve a medium sand finish.

OMEGAFLEX FINE
OmegaFlex Fine Finish utilizes approximately 0.3 mm quartz aggregates and can be troweled or floated to achieve an imperfect smooth type finish. Ideal for AkroTique.

AKROFLEX

ACRYLIC STUCCO FINISH

SEMI-SMOOTH
Semi-Smooth Finish utilizes approximately 0.3 mm quartz aggregates and can be troweled to achieve an imperfect smooth Mission-style or Old World appearance. Ideal for AkroTique.

PEBBLE BEACH
Pebble Beach Finish is part of the Desert Series Finishes and utilizes ~1.5 mm silica aggregates to produce a uniform medium sand finish. Requires Desert Series color bottle.

CIRCLETEX
CircleTex Finishes utilize quartz aggregates and can produce a true worm driven appearance. It is available in either a medium (~1.5 mm) or coarse (3 mm) aggregate finish. (CircleTex Coarse pictured)

DELTA
Delta Finish utilizes approximately 1.5 mm quartz aggregates and can be floated to create a medium sand finish or troweled to achieve a lace texture.

SAHARA SAND
Sahara Sand Finish is part of the Desert Series Finishes. It is available in either standard (~1.0 mm) and fine (~0.8 mm) silica aggregates that produce a uniform medium to fine sand finish. Requires Desert Series color bottle.

MALIBU
Malibu Finishes utilize quartz aggregates and come in the following options: Malibu 12 (~1.5 mm): Coarse sand finish with slight worm driven appearance. Malibu 16 (~1.2 mm): Medium sand finish with slight worm driven appearance. Malibu 20 (~0.8 mm): Fine sand finish with reflective quartz aggregate. Malibu Fine (~0.8 mm): Imperfect smooth type finish with irregularities. (Malibu 16 pictured)
