Efflorescence Doesn't Have to Happen

Omega's E-FX Admix is designed to help reduce efflorescence and improve the performance in approved cement-based stucco products.

THE PROFESSIONAL'S CHOICE SINCE 1974

E-FX ADMIX

Efflorescence Reducing Admixture

Use Omega's E-FX Admix to Prevent Efflorescence

When added to cement-based products, E-FX Admix will offer long lasting protection for your stucco finish by:

- Greatly reducing the occurrence of efflorescence
- Improving freeze-thaw durability
- Easy to use pre-measured bottles
- Allowing substrate to breathe

E-FX Admix may be added to OmegaCoat, ColorTek Stucco, Diamond Wall, Super Cement, field mix Scratch & Brown Coats and other approved cement-based products.

Contact your local sales representative for more information.
