

# BUYER'S GUIDE

THE FULL LINE OF OMEGA PRODUCTS

## WALL SYSTEMS

- EIFS Systems
- One Coat Stucco
- Three Coat Stucco
- Crack Isolation

## FINISHES

- Cementitious Stucco
- 100% Acrylic Stucco
- Coatings
- Lime-based Plasters

## ABC'S

- Admixers
- Bonders
- Cleaners
- Sealers

## OTHER PRODUCTS

- Architectural Foam Coatings
- Liquid Applied Water Resistive Air Barriers
- Veneer Mortars & Grout

MANUFACTURING A COMPLETE FAMILY OF PREMIUM WALL SYSTEM PRODUCTS

[omega-products.com](http://omega-products.com)

PRIVATELY OWNED  
AMERICAN MADE

OMEGA PRODUCTS INTERNATIONAL is a leader in commercial and residential exterior stucco wall systems and finishes. Our state-of-the-art manufacturing facilities, unsurpassed quality control, industry-leading wall system warranties, and commitment to service has made us the professional's choice since 1974.

Omega Products provides the most complete line of exterior stucco wall systems and finishes, including ColorTek Stucco, OmegaFlex 100% Acrylic Finishes, Diamond Wall One Coat Stucco Systems, AkroFlex Exterior Insulation Finish Systems (EIFS), and Masonry Adhered Veneer Systems (MAVS). Additionally, Omega manufactures performance enhancing admixtures, bonders, elastomeric coatings, and interior finishes.

Omega's Valentino brand manufactures authentic decorative Venetian plaster for upscale designer wall applications. Omega's Siena Products division produces a full line of floor preparation and tile & stone installation products.

Premium, Yet Practical Solutions For Veneer & Masonry Installations

Omega Product's Masonry Adhered Veneer Systems (MAVS) offers contractors and architectural specifiers high performance installation products for challenging adhered veneer installations.

- Premium bonding mortars and grouts.
- Engineered for demanding vertical applications, including large format and heavy veneers.
- Industry-leading warranties, including combined system warranties with Omega's stucco products.

BASE COATS

BASE COATS

Diamond Wall Concentrate (DWC)

A factory prepared blend of cement, chopped fibers, and proprietary ingredients field mixed with sand, water, and an optional admix. DWC is the base coat used in the Diamond Wall Stucco Systems.

Coverage

Approximately 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>) per bag at 3/8" thick. Coverage may vary.

Packaging

80 lb (36.3 kg) bags

Pallets

40 – 80 lb bags per pallet, 3,200 lbs (1,451 kg) net ‡

Shelf Life

1 year

Color

Natural grey cement

SKU

X070-0011 ..... Grey

TYPE

Diamond Wall Sanded

A factory prepared blend of cement, proprietary ingredients, and sand that is mixed with water and an optional admix. Diamond Wall Sanded is the base coat for the Diamond Wall Stucco Systems.

Coverage

Approximately 2.2yd<sup>2</sup> to 2.5yd<sup>2</sup> (1.8m<sup>2</sup> to 2.1m<sup>2</sup>) per 80 lbs. at 3/8" thick. Coverage may vary.

Packaging

80 lb (36.2 kg) bags

3,000 lb (1,360 kg) super sacks

Pallets

42 – 80 lb bags per pallet, 3,360 lbs (1,522 kg) net ‡

TYPE

Diamond Wall Pro Concentrate  
(Replaces Diamond Wall PM)

A cementitious, fiber-reinforced, polymer-modified base coat that offers an upgrade to current one coat stucco systems by providing improved crack resistance, flexural and tensile strength, and impact resistance. It is a factory-prepared blend of cement, chopped fibers, dry polymers, and proprietary ingredients field mixed with sand and water. Diamond Wall Pro Concentrate is the base coat used in the Diamond Wall Pro Stucco Systems.

Coverage

Approximately 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>) per bag at 3/8" thick. Coverage may vary.

Packaging

80 lb (36.3 kg) bags

SKU

X070-0073 ..... Grey

TYPE

DryBond

A dry blend, polymer-modified cement that when mixed with water at the job site, produces a high-performance, easily applied adhesive and base. DryBond may be used as an adhesive and base coat for EPS foam shapes. Additionally, it may be used in the Omega Crack Isolation System and as a leveling coat over approved substrates.

Coverage

Approximately 80ft<sup>2</sup> to 130ft<sup>2</sup> (7.4m<sup>2</sup> to 12.1m<sup>2</sup>) per bag. Coverage may vary.

Packaging

50 lb (22.7 kg) bags

‡Listed pallet weights are for material only (excludes weight of pallet).

FoamTek

A dry blend, polymer-modified, cement-based material specifically formulated for coating and attaching architectural EPS foam shapes to approved substrates. It is available in FoamTek 60 (fine), FoamTek 30 (medium), FoamTek 20 (med- coarse), or FoamTek 16 (coarse). FoamTek is also available in a highly flexible version (FoamFlex), semi-flexible (FlexBase), and high impact (FoamTek HI).

Coverage

FoamTek 60, 30, and 20: Approximately 90ft<sup>2</sup> (8.4m<sup>2</sup>)

FoamTek 16: Approximately 60ft<sup>2</sup> (5.6m<sup>2</sup>)

Coverage may vary.

NOT FOR EIFS

Super Cement

A premium, all purpose, plastering cement that is a mixture of cement and proprietary ingredients, which will increase the workability and early strength of the product. Super Cement is an excellent alternative to plastic cement and meets or exceeds job site requirements for cement-based plaster. Super Cement is available either as fibered or non-fibered.

Coverage

Approximately 10yd<sup>2</sup> to 11.1yd<sup>2</sup> (8.4m<sup>2</sup> to 9.3m<sup>2</sup>) per sack at 3/8" thick. Coverage may vary.

Packaging

94 lb (42.6 kg) bags

Styro Admix

A 100% acrylic admix that is field mixed with Omega's acrylic finishes and cement to create an adhesive and base coat. Styro Admix saves contractors money, by allowing them to create an economical base coat and/or adhesive from leftover AkroFlex or OmegaFlex finishes. This base coat/adhesive can be used to coat and attach EPS foam shapes or as skim coat over approved substrates.

Coverage

Approximately 400ft² to 600 ft² (37.2m² to 55.7m²) as a base coat and 350 ft² to 550 ft² (32.5m² to 51m²) as an adhesive.

REDUCE STUCCO CRACKING

Omega Products International's Crack Isolation System is an effective method used to reduce the appearance of surface cracking in new and existing plaster systems. With stucco cracking continuing to be one of the most common complaints from building owners, Omega's Crack Isolation System is a cost effective way to improve customer satisfaction and reduce callbacks or repairs. It is also a great choice for repairing or refreshing an existing stucco building that has surface cracking.

CEMENTITIOUS STUCCOS • COLOR

ColorTek Exterior Stucco

A premium, factory blended, cement-based, stucco finish manufactured from the highest-grade cement, hydrated lime, graded aggregates, and specific additives. ColorTek comes in various aggregate combinations that allow design flexibility and a variety of finish textures.

Coverage

Coarse, 16/20 and 20/30

Dash Finish: 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>)

Texture Finish: 10yd<sup>2</sup> to 16yd<sup>2</sup> (8.4m<sup>2</sup> to 13.4m<sup>2</sup>)

Float Finish: 15yd<sup>2</sup> to 20yd<sup>2</sup> (12.5m<sup>2</sup> to 16.7m<sup>2</sup>).

30/30

Float Finish (Scratch & Double): 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>). Coverage may vary.

Packaging

90 lb (40.8 kg) bags

ColorTek SmoothCoat

A premium, factory blended, cement-based stucco finish used to create a smooth Santa Barbara or Mission type finish. It is manufactured from the highest-grade cement, hydrated lime, graded aggregates, and specific additives.

Coverage

8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>) with required double application. Coverage may vary.

Packaging

90 lb (40.8 kg) bags

ColorTek Premium Paint Grade (PG) Stucco

A premium, factory blended, cement-based, stucco finish manufactured from the highest-grade cement, hydrated lime, graded aggregates, and specific additives. ColorTek Premium PG comes in various aggregate combinations that allow design flexibility and a variety of finish textures. ColorTek Premium PG is designed to be painted and cannot be used with the ColorPak coloring system.

Coverage

Coarse, 16/20 and 20/30

Dash Finish: 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>)

Texture Finish: 10yd<sup>2</sup> to 16yd<sup>2</sup> (8.4m<sup>2</sup> to 13.4m<sup>2</sup>)

Float Finish: 15yd<sup>2</sup> to 20yd<sup>2</sup> (12.5m<sup>2</sup> to 16.7m<sup>2</sup>)

30/30 Float Finish (Scratch & Double): 8yd<sup>2</sup> to 10yd<sup>2</sup> (6.7m<sup>2</sup> to 8.4m<sup>2</sup>). Coverage may vary.

ColorPak

A dry blended formulation of iron oxide pigments used to color ColorTek Stucco. ColorPak may be used to color the following products:

- ColorTek Exterior Stucco
- ColorTek SmoothCoat
- Travertino

NOTE: Adding ColorPak to materials other than those listed will not produce the same colors. The color choice will determine the required ColorTek Base designation and should be properly coordinated.

CEMENTITIOUS FINISHES • FOG COATS

OmegaCoat (Fog Coat)

A cementitious fog coat, OmegaCoat is a spray-applied cement-based, water-soluble, pigmented coating, which cures to become an integral part of the stucco surface and maintains original finish characteristics. It is an economical method to achieve color uniformity and to enhance or refresh the appearance of existing stucco.

Coverage

Approximately 400ft<sup>2</sup> to 900ft<sup>2</sup> (37.2m<sup>2</sup> to 83.6m<sup>2</sup>). Coverage may vary.

OmegaCoat Plus (Premium Fog Coat)

A premium, cementitious, polymer-modified fog coat, OmegaCoat Plus is a spray-applied pigmented coating, which cures to become an integral part of the stucco surface and maintains original finish characteristics. When compared to standard fog coat, OmegaCoat Plus has improved adhesion and water-resistance, while reducing the likelihood of color streaking and efflorescence. When compared to paint, OmegaCoat Plus is longer-lasting, more durable, and more breathable.

Coverage

Approximately 400ft<sup>2</sup> to 900ft<sup>2</sup> (37.2m<sup>2</sup> to 83.6m<sup>2</sup>). Coverage may vary.

SuperFog (Fog Coat)

A premium coating designed to achieve color uniformity while refreshing the appearance of existing stucco or other porous substrates. Unlike paint, SuperFog helps to retain the surface's natural appearance and properties. SuperFog is not at risk of efflorescing or having a blotchy finish like standard cement-based fog coats.

Coverage

Approximately 320ft<sup>2</sup> to 480ft<sup>2</sup> (30m<sup>2</sup> to 45m<sup>2</sup>) at two coats. Coverage may vary.

Travertino Finishes

A cementitious interior/exterior finish manufactured with a mixture of various size aggregates designed to achieve a variety of sedimentary stone appearances, such as travertine, limestone, and sandstone. Travertino can create a pitted look like that of classic Tuscan stone or can be troweled/ground to achieve a smooth stone appearance. Designs can also be carved into Travertino during application and can be used to cast special shapes. Travertino is an excellent choice to create a beautiful, warm sedimentary stone appearance with a lower cost, lower weight, and shorter lead time than real stone. Available in Fine and Standard textures.

OmegaCrete

A premium, one component, polymer-modified cementitious coating designed to create a smooth finish on poured-in-place, tilt-up, precast, or other concrete. Specially formulated to be easily applied over these porous substrates, OmegaCrete will cure to become an integral part of the wall while maintaining the wall's durability and breathability. OmegaCrete is an excellent choice to cover bugholes, honeycombs, and other small imperfections in concrete surfaces to produce a clean, uniform, smooth appearance.

ACRYLIC FINISHES

AkroFlex Malibu Finishes

100% acrylic-based finishes using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the aggregate size and application method. Enhances the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Available in the following aggregate sizes: *MALIBU 12* (~1.5mm): coarse sand-like finish with slight worm driven appearance; *MALIBU 16* (~1.2mm): medium sand-like finish with slight worm driven appearance; *MALIBU 20* (~0.8mm): fine sand-like finish with reflective quartz aggregate; *MALIBU FINE* (~0.8mm): imperfect smooth-type finish with irregularities.

**Coverage**  
Approximately 100ft² to 140ft² (9.3m² to 13.0m²). Coverage may vary.  
**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**  
2 years  
**Color**  
Packaged white and may be colored using the Omega Color Bottle System.  
**SKU** **TYPE**  
**See Price List** ..... 5 gal. Pail

AkroFlex Semi-Smooth Finishes

100% acrylic-based finish using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the application method. Semi-Smooth Finish will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Semi-Smooth Finish utilizes approximately 0.3mm aggregates and can be troweled to achieve an imperfect smooth Mission-style finish or Old World appearance.  
**Coverage**  
Approximately 130ft² to 150ft² (12.1m² to 13.9m²). Coverage may vary.

**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**  
2 years  
**Color**  
Packaged white and may be colored using the Omega Color Bottle System.  
**SKU** **TYPE**  
**See Price List** ..... 5 gal. Pail

AkroFlex Delta Finishes

100% acrylic-based finish using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the application method. Delta Finish will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Delta Finish utilizes approximately 1.5mm aggregates and can be utilized to create a medium sand-like finish or lace texture.  
**Coverage**  
Approximately 90ft² to 120ft² (8.4m² to 11.2m²). Coverage may vary.

**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**  
2 years  
**Color**  
Packaged white and may be colored using the Omega Color Bottle System.  
**SKU** **TYPE**  
**See Price List** ..... 5 gal. Pail

AkroFlex CircleTex Finishes

100% acrylic-based finishes using the latest Dirt Pick-up Resistance (DPR) technology, CircleTex Finishes can be utilized to produce a true worm driven appearance. CircleTex Finishes will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish and are available in the following finishes: *MEDIUM* (~1.5mm) or *COARSE* (~3mm).  
**Coverage**  
Approximately 90ft² to 120ft² (8.4m² to 11.2m²). Coverage may vary.

**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**

ACRYLIC FINISHES

AkroFlex Desert Series Finishes

Pebble Beach and Sahara Sand finishes are 100% acrylic-based using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the aggregate size and application method. Desert Series Finishes will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Desert Series Finishes utilize silica aggregates and are available in the following finishes: *SAHARA SAND FINE* (~0.8mm): uniform fine sand-like finish. *SAHARA SAND* (1.0mm): uniform med. to fine sand-like finish. *PEBBLE BEACH* (~1.5mm): uniform med. sand-like finish. *Not available in all markets*  
**Coverage**  
Approximately 90ft² to 140ft² (8.4m² to 13.0m²). Coverage may vary.

**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**  
2 years  
**Color**  
Packaged white and may be colored using the Omega Color Bottle System. *Desert Series Finishes require special color formulations. Standard Omega color bottles will not produce accurate colors. To be sure you have the correct color bottle for your Desert Series Finish, look for the distinctive red cap.*

**See Price List** ..... Sahara Sand 5 gal. Pail

AkroLastic Finishes

A 100% acrylic-based, elastomeric, textured finish. AkroLastic Finishes provide enhanced elasticity and a weather-resistant finish, which will enhance the appearance of any plastered structure. AkroLastic Finishes help bridge the hairline structural and shrinkage cracks inherent in traditional cement-based plaster construction. Available in all AkroFlex texture options. AkroLastic Finishes are designed to be used with the AkroFlex EIF Systems and also as an interior or exterior finish.  
**Coverage**  
Approximately 100ft² to 140ft² (9.3m² to 13.0m²). Coverage may vary.

**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †  
**Shelf Life**

**See Price List** ..... 5 gal. Pail

AkroLastic ProPlus Finishes

AkroLastic ProPlus Finishes are 100% acrylic-based, elastomeric, textured finishes that use the latest Dirt Pick-up Resistance (DPR) technology. They provide improved elasticity, weather resistance, and stain resistance than standard acrylic finishes. AkroLastic ProPlus Finishes help bridge the hairline structural and shrinkage cracks inherent in traditional cement-based plaster construction. Available in the following finishes: *COARSE* (~1.5mm): Heavy sand-like finish; *MEDIUM* (~0.8mm): Medium sand-like finish; *FINE* (~0.3mm): Imperfect smooth-type finish.

**Coverage**  
Approximately 90ft² to 140ft² (8.4m² to 13.0m²). Coverage may vary.  
**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails  
**Pallets**  
32 – 5 gal. pails per pallet, 2,080 lbs (942 kg) net †

OmegaFlex Finishes

100% acrylic-based finishes using the latest Dirt Pick-up Resistance (DPR) technology that are formulated with high-quality acrylic resins, graded aggregates, and proprietary additives. They provide a flexible, durable, integrally colored finish, which will enhance the appearance of any plastered structure. OmegaFlex Finishes may be sprayed or troweled to achieve a variety of texture options and are available in the following finishes: *COARSE* (~1.5mm): heavy sand-like finish; *MEDIUM* (~0.8mm): medium sand-like finish; *FINE* (~0.3mm): imperfect smooth-type finish; ideal for AkroTique; *SWIRL MEDIUM* (~1.5mm): Medium random swirl pattern; *SWIRL COARSE* (~3mm): Heavy random swirl pattern.

**Coverage**  
Approximately 110ft² to 190ft² (10.2m² to 17.7m²). Coverage may vary.  
**Packaging**  
65 lb (29.5 kg), 5 gallon (18.9 L) pails

COATINGS • ELASTOMERICS

RynoTex

An acrylic-based, textured coating that may be roller or spray applied to create a light to heavy sand textured appearance. Using the latest dirt pick-up resistant (DPR) technology, RynoTex creates a long-lasting, low maintenance, integrally colored finish over a variety of approved substrates. RynoTex is available in the following textures: *COARSE*: Heavy sand-like finish; *MEDIUM*: Medium sand-like finish; *FINE*: Fine sand-like finish.

**Coverage**  
Approximately 350ft<sup>2</sup> to 700ft<sup>2</sup> (32.5m<sup>2</sup> to 65m<sup>2</sup>). Coverage may vary.

**Packaging**  
55 lb (25 kg), 5 gallon (18.9 L) pails

**Pallets**  
32 – 5 gal. pails per pallet, 1,760 lbs (798 kg) net †

**Shelf Life**  
2 years

**Color**  
Packaged white and may be colored using the Omega Color Bottle System.

AkroCoat

A 100% acrylic-based coating that provides a long-lasting, integrally colored finish, AkroCoat offers excellent efflorescence and alkali resistance on cement-based surfaces such as stucco or masonry with a pH up to 13. Breathable with great dirt pickup resistance, AkroCoat will enhance the appearance of any properly prepared, approved substrate.

**Coverage**  
Approximately 100ft<sup>2</sup> to 450ft<sup>2</sup> (9.3m<sup>2</sup> to 41.8m<sup>2</sup>) per gallon. Coverage may vary.

**Packaging**  
55 lb (24.9 kg), 5 gallon (18.9 L) pails

**Pallets**  
32 – 5 gal. pails per pallet, 1,760 lbs (797 kg) net †

**Shelf Life**  
2 years

**Color**

**SKU** ..... **TYPE**

**See Price List** ..... **5 gal. Pail**

Elastomeric 44

A 100% acrylic-based, elastomeric coating that provides enhanced elasticity, improved weather resistance, and can help to prevent the reoccurrence of hairline cracking. Elastomeric 44 will enhance the appearance of any approved substrate. Elastomeric 44 is designed for professional results as an interior/exterior coating over a variety of substrates in residential or industrial structures. For best results, substrates should be prepared with Omega AkroFlex Base Primer.

**Coverage**  
Approximately 250ft<sup>2</sup> to 400ft<sup>2</sup> (23.2m<sup>2</sup> to 37.2m<sup>2</sup>) per pail, at 20 mils wet thickness. Coverage may vary.

**Packaging**  
50 lb (22.7 kg), 5 gallon (18.9 L) pails

**Pallets**  
32 – 5 gal. pails per pallet, 1,600 lbs (724 kg) net †

AkroTique

A pigmented acrylic sealer designed to create a rustic, mottled finish similar to the timeless beauty of century old plaster. AkroTique offers an “Old World” look that does not take a lifetime to create. AkroTique also can be used without color as a sealer. AkroTique may be applied to: AkroFlex and OmegaFlex finishes, ColorTek stucco and other approved cementitious substrates, poured-in-place and/or tilt-up concrete, properly prepared interior/exterior painted surfaces and Valentino lime-based finishes.

**Coverage**  
Approximately 300ft<sup>2</sup> to 1,000ft<sup>2</sup> (27.9m<sup>2</sup> to 92.9m<sup>2</sup>) per gallon, per coat. Coverage may vary.

**Packaging**  
1 gallon (3.8 L) pre-mixed only,  
5 gallon (18.9 L)

**Pallets**  
32 – 5 gal. pails per pallet, 1,280 lbs (579 kg) net †

PRIMERS • COLOR FOR ACRYLIC SYSTEMS

RapidPrime

(Replaces OmegaFlex Base Primer)

Formulated for use as a priming agent under all Omega acrylic-based textured finishes, coatings, and similar products to promote bond strength, color consistency, and uniform suction, while increasing water-resistance and finish coverage. It offers excellent efflorescence and alkali resistance on cement-based surfaces with a pH up to 13, such as new stucco, concrete, and masonry. With its high alkali resistance, RapidPrime can be applied without having to wait for the cement-based substrate to drop in pH, thus saving time and money. RapidPrime Sanded is also available to create a fine sand texture.

Coverage

Approximately 1,400ft<sup>2</sup> to 2,000ft<sup>2</sup> (130m<sup>2</sup> to 185m<sup>2</sup>) per pail. Coverage may vary.

**Packaging**  
55 lb (24.9 kg), 5 gallon (18.9 L) pails

**Pallets**  
32 – 5 gal. pails per pallet, 1,760 lbs (797 kg) net †

Approximately 1,400ft<sup>2</sup> to 2,000ft<sup>2</sup> (130.1m<sup>2</sup> to 185.8m<sup>2</sup>) per pail. Coverage may vary.

Color Bottle System

A factory blended, premixed liquid coloring system providing an accurate method for adding pigments to the AkroFlex Finishes, OmegaFlex Finishes, and other approved Omega products that require liquid integral color. For AkroFlex Finishes, OmegaFlex Finishes, and StyroGlue TF use one bottle per pail.\* For AkroFlex Base Primer and Omega RapidPrime use two bottles per pail.\*

\* Some colors may require two bottles per finish pail and four bottles per primer pail.

**Packaging**  
4 fl oz (118 mL), 8 fl oz (236 mL) or  
16 fl oz (473 mL) bottles

**Shelf Life**

OMEGA IS ALL ABOUT COLORS

Omega's state of the art color labs can match any color in the industry

Use the online Omega Sample Request System. It is the fastest and easiest method to order a sample.

**AkroGuard**

A flexible, liquid-applied coating that creates a water-resistive air barrier when used as part of the AkroGuard System. AkroGuard is field applied and designed for use as a water-resistive barrier (WRB) and vapor-permeable barrier that seamlessly wraps the structure. It can be applied over a variety of substrates and be used under different wall systems, including AkroFlex EIFS, stucco, brick, stone veneer, or siding. It is used in conjunction with AkroGuard Fabric, a reinforced, non-woven polyester fabric to treat and reinforce joints, corners, rough openings, and other transitions within the AkroGuard WB-AB Assembly. The AkroGuard System complies with ICC-ES acceptance criteria for water-resistive coatings (AC212) and ASTM standards as an air barrier.

**Coverage**

Approximately 300ft<sup>2</sup> to 650ft<sup>2</sup>. Coverage may vary.

**Packaging**

60 lb (27.2 kg), 5 gallon (18.9 L) pails

**AkroFill**

A non-cementitious, ready-mixed, flexible joint compound manufactured with high-grade fiber fillers and 100% acrylic polymers. AkroFill is a trowel applied, flexible joint compound designed to bridge sheathing joints and rough openings when used in conjunction with embedded Omega Starter Mesh. When used as part of the AkroGuard System, it creates a weather-resistive air barrier over approved substrates.

**Coverage**

Approximately 170 to 240 linear feet of sheathing joints and rough openings. Coverage may vary.

**Packaging**

56 lb (25.4 kg), 5 gallon (18.9 L) pails

Omega Products International's AkroGuard is an assembly of water-resistant air barrier (WR-AB) materials that offers superior protection against water and air intrusion. Spray, roll, or brush applied, AkroGuard is easy to apply, seamless, and durable.

ADMIXTURES • BONDERS

ADMIXTURES • BONDERS

Admix 500

Admix 500 is a 100% acrylic polymer admixture for cementitious products. Admix 500 is used to increase tensile, bond, and flexural strength of approved products. Admix 500 may be added to the following products: cementitious stucco, approved cement-based products, liquid component in a sand/cement slurry coat, scratch and brown coats and scrub coat.  
NOTE: Contact an Omega representative for use in other products.

TYPE

AkroLoc

AkroLoc is a 100% acrylic polymer bonder or admixture for cementitious products. AkroLoc can be used in bonding new cement-based products to a variety of existing properly prepared substrates and as an admixture to reduce cracking and increase tensile, bond, and flexural strength of approved products. As a bonding agent over: one coat products, plaster brown coats, and stucco, CMU, masonry, poured-in-place and/or tilt-up concrete, approved Omega base coats and approved cement-based products. As an admix in: Approved cement-based products and as a liquid component in a sand/cement slurry coat.

Coverage

Approximately 100ft<sup>2</sup> to 400ft<sup>2</sup> (9.3m<sup>2</sup> to 37.2m<sup>2</sup>) per gallon as a bonder. Coverage may vary.

OmegaCure

OmegaCure is a non-corrosive, liquid admixture used to accelerate the hydration of cement-based materials. A more advanced hydration state will result in higher early strength, faster hardening, higher abrasion resistance, reduced void content, and decreased water movement within the cement matrix. OmegaCure may be added to the following products: one coat stucco, scratch and brown coat, cementitious finish coats, cement plasters, and other approved cementitious products.

**X200-0018** ..... 1 lb. Package

TYPE

E-FX Admix

E-FX Admix is designed to help reduce efflorescence and improve the performance in approved cement-based stucco products. When added to the material, E-FX Admix will offer long-lasting protection from the elements while retaining the surface's natural appearance and vapor permeability. E-FX Admix may be added to the following products: OmegaCoat, fog coat products, ColorTek Stucco, cement-based stucco products, and other approved cement-based products.

Packaging

4 fl oz (118 mL) bottles, 16 per case

1 gallon (3.8L) bottles

Shelf Life

Minimum of 1 year. Depending on storage conditions, the shelf life may be greater than stated.

Color

Milky light-brown

	Application	Apply up to 10 days prior to material	Apply bonding material while AkroLoc is still tacky.

SEALERS

CLEANERS

OmegaGuard

OmegaGuard is a silicon-based, clear, non-yellowing water repellent designed to seal porous, cement-based substrates such as stucco, brick, masonry, and other concrete surfaces. OmegaGuard will offer long-lasting protection from the elements while retaining the surface's natural appearance and vapor permeability. OmegaGuard may be applied over the following substrates: stucco, masonry, poured-in-place and/or tilt-up concrete, cementitious surfaces, approved interior products, porous tile, brick, stone, and slate.

**Coverage**  
100ft<sup>2</sup> to 300ft<sup>2</sup> (9.3m<sup>2</sup> to 27.9m<sup>2</sup>) per gal. Coverage may vary.

**Packaging**  
1 gallon (3.8 L) bottles, 4 per case  
5 gallon (18.9 L) pails

**Pallets**  
128 – 1 gal. bottles per pallet, 1,088 lbs (493 kg) net +

SEALERS

	OmegaGuard	OmegaSeal 1000
Technology	Silicon-based	Acrylic-based sealer
Area of Use	Vertical, porous materials such as stucco, masonry, or stone	Vertical, cement-based materials, stone, or acrylic surfaces
Method of Sealing	Penetrates into the surface pores	Creates continuous protective film on surface
Appearance	Natural	Slight sheen
Stain Resistance	Water-based stains	Water-based stains Oil-based stains
Can be Painted After Application?	No	Yes

Stucco Cleaner

From the leading manufacturer of stucco products, Omega Stucco Cleaner is designed to dissolve dirt and some stains from stucco walls and similar products. It is a concentrated, water-based detergent that will penetrate the surface to help remove stains without damaging the finish. Regular cleaning of stucco walls will keep them looking new for many years.

VENEER MORTARS & GROUT

SEALANT

MAVS 1000

MAVS 1000 is a polymer-modified, factory blended mortar specifically designed for bonding thin natural stone and manufactured veneers. This bonding mortar is a mixture of cement, specialty polymers, aggregate, and other proprietary additives. The advanced technology and high quality ingredients gives MAVS 1000 excellent workability, greater sag and efflorescence resistance, and superior bond strength than standard Type S or field mixed mortars. MAVS 1000 is an excellent choice for some of the more challenging masonry applications, such as stacked stone.

Coverage

Trowel Size	1/4" x 1/4"	1/4" x 3/8"	1/2" x 1/2"	Masonry Method

MAVS 2000

MAVS 2000 is a premium, polymer-modified, factory blended mortar specifically designed for bonding natural and manufactured veneers, precast, most tile, and thin brick. This bonding mortar is a mixture of cement, specialty polymers, aggregate, and other proprietary additives that give MAVS 2000 excellent workability and sag resistance with greater efflorescence resistance and bond strength than standard Type S mortars. MAVS 2000's advanced technology improves adhesion and is an excellent option for more challenging masonry applications, such as stacked stone and large or heavy veneers.

MAVS 3000

MAVS 3000 is a highly polymer-modified, factory blended mortar specifically designed for bonding natural stone, manufactured veneers, precast, most tile, and thin brick. This bonding mortar is a mixture of cement, specialty polymers, aggregate, and other proprietary additives that give MAVS 3000 excellent workability and sag resistance with greater efflorescence resistance and bond strength than standard Type S or slightly modified mortars. MAVS 3000 advanced technology improves adhesion and is an excellent option for the most challenging veneer applications, such as large format and heavy veneers.

Coverage

Trowel Size	1/4" x 1/4"	1/4" x 3/8"	1/2" x 1/2"	Masonry Method

MAVS Grout & Masonry Mortar

MAVS Grout & Masonry Mortar is manufactured with cement, lime, masonry aggregates and other proprietary additives to produce a high quality masonry mortar. It is used for grouting interior and exterior applications of most natural and manufactured veneers, thin brick, pavers, brick, tile, stone, precast, and block. MAVS Grout & Masonry Mortar may also be used to set full brick and block units. Omega AkroLoc or Siena Admix AX100 latex admixtures can be used to impart greater flexibility, improve bond strength, increase water retention, and surface appearance.

Coverage

Approximately 45 ft² (4.2 m²) per bag on a 6" x 12" veneer with a 1/2" x 1/2" grout joint.

Coverage may vary.

MAVS Adhesive Sealant

MAVS Adhesive Sealant is a professional grade, fast drying, non-sag sealant for use in expansion joints for masonry, stone, tile and other applications. It is available in hundreds of colors in either sanded or smooth texture to match the specific application needed. It is paintable, mold and mildew resistant, and adheres to multiple types of substrates. MAVS Adhesive Sealant can be used on: brick, block, natural stone, concrete, porcelain & ceramic tile, steel, aluminum, glass, wood, plastic, vinyl, and fiberglass. Conforms to ASTM C920 Type S, Grade NS, Class 50, Use T, M, G, A, O & TT-S-230C, Type II, Class A.

Coverage

A 10.3 fl oz. tube will approximately covers 24 lineal feet in a 1/4" x 1/4" joint, and 12 lineal feet in a 1/4" x 1/2" joint.

Coverage may vary due to actual joint size, depth and application.

Packaging

10.3 fl oz tube, 10 tubes per case, two case (20 tube) minimum.

Shelf Life

6 months

Color

Available in standard and custom colors, in sanded or smooth texture.

GET UP TO A 35 YEAR WARRANTY USING MAVS

One of the unique features of MAVS is the industry-leading warranties that can be integrated with Omega's wall system products. These exceptional wall system warranties incorporate Omega's already proven wall assemblies with our high-performing MAVS bonding mortars.

Adhered veneer is often being installed over Omega Super Cement Three Coat Systems or Omega Diamond Wall One Coat Systems. When using MAVS to install veneer, the builder or owner receives veneer bonding mortars that are verified to perform over Omega wall systems, plus the integrated warranty that covers the wall assembly from the scratch coat to the veneer. The warranty length depends on the combination of Omega products used.

MAVS with Omega Wall Systems

1. Framing / Sheathing (by other)
2. AkroGuard Water-resistive Barrier <sup>1</sup>
3. Secondary WRB (by other)
4. Foam Sheathing (optional)
5. Lath (by other)
6. Diamond Wall One Coat Base Coat <sup>2</sup>
7. Super Cement Scratch and Brown <sup>2</sup>
8. MAVS 1000, 2000, 3000 Bonding Mortar
9. Adhered Veneer (by other)
10. MAVS Grout & Mortar or Adhesive Sealant

<sup>1</sup> Using AkroGuard will increase the warranty an additional 5 years

<sup>2</sup> Omega AkroLoc, Admix 500, or PolyLoc admix may be used to improve base coat tensile/flexural strength and water-resistance. Using admix will increase the warranty an additional 5 years.

# WARRANTIES

Omega Products International is proud to manufacture only the highest quality products with excellent warranty plans. All of our products are warrantied to be free from defects for a period of one year from the date of purchase. Only a proof of purchase is required to receive this warranty; no form needs to be submitted to Omega Products.

Additionally, Omega has multi-year extended warranties for wall systems that utilize Omega products. The length of the warranty depends upon the combination of products used. The following warranties are available:

The table below can be used to determine the length of time for the system warranty. First, select the wall system or product used on the project from the Base System column. Next select the type of finish used on the project from the Finish column. Finally, if applicable, select any options that were used from the Options column. The warranty length is the sum of the years from the base system, finish, and options used on the project. For example, a project using Diamond Wall (3 years) with OmegaFlex (5 years), and Primer (3 years) would have an 11-year warranty.

BASE SYSTEM	YRS	FINISH	YRS	OPTIONS	YRS	TOTAL YEARS
