AkroFlex Delta Finish is a 100% acrylic-based finish using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the application method. Delta Finish will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Delta Finish utilizes approximately 1.5mm aggregates and can be utilized to create a medium sand-like finish or lace texture.

### Features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% Acrylic</td>
<td>Excellent adhesion and UV resistance</td>
</tr>
<tr>
<td>Integral Color</td>
<td>Lasting, uniform color that resists fading or discoloration; UV resistant</td>
</tr>
<tr>
<td>Crack Resistant</td>
<td>Acrylic polymers allow some elongation without cracking</td>
</tr>
<tr>
<td>Moisture Resistant</td>
<td>Helps resist water intrusion into the wall cavity</td>
</tr>
<tr>
<td>Easy to Clean</td>
<td>Resists dirt accumulation and may be rinsed clean with water</td>
</tr>
<tr>
<td>Vapor Permeable</td>
<td>Allows wall to naturally breathe which aids drying and helps to prevent mold or blistering</td>
</tr>
<tr>
<td>Easy to Use</td>
<td>Premixed with no additives required; cleans up with water</td>
</tr>
<tr>
<td>VOC Compliant</td>
<td>Less than 27 g/L</td>
</tr>
</tbody>
</table>

### Basic Uses

Delta Finish is designed to be used with the AkroFlex EIF Systems and also as an interior or exterior finish. It is a suitable finish for AkroTique.

### Area of Use

Delta Finish may be applied to the following substrates. For best results, substrates should be prepared with AkroFlex Base Primer.

1. AkroFlex EIF System base coats
2. All Omega base coats
3. One coat stucco/brown coat-existing stucco
4. CMU/poured-in-place and/or tilt-up concrete/masonry
5. Properly prepared gypsum drywall (interior)
6. Other substrates as approved by Omega Products International

### Optional Product Upgrades/Enhancements

<table>

<tbody>
<tr>
<td>Primer</td>
<td>Promotes bond strength, color consistency, and uniform suction, while increasing water resistance and finish coverage</td>
</tr>
<tr>
<td>Crack Isolation System</td>
<td>Supplementary system designed to mitigate surface cracking in new and existing plaster systems by integrating woven fiberglass mesh into the base coat or brown coat prior to applying the finish</td>
</tr>
</tbody>
</table>
**Application Instructions**

**Surface Preparation**

All surfaces to receive application must be clean and free of loose debris, dirt, dust, efflorescence, grease, oils, curing agents, and cleaning solutions. Ensure that all surfaces are smooth and free of any irregularities. Repair all cracks with the appropriate patching material for the existing substrate. Painted or glossy surfaces must be roughened to ensure a proper bond. It is recommended that all approved substrates be coated with AkroFlex Base Primer to enhance the material’s performance. One coat and three coat stucco products must be adequately cured and concrete must cure for a minimum of 28 days.

**Mixing**

1. AkroFlex Finishes must be thoroughly mixed prior to use with a paddle mixer. Refer to the Omega Color Bottle System Product Data Sheet for color mixing instructions.
2. If multiple pails are being used, intermix (box) pails to achieve color consistency.

**NOTE:** To ensure color consistency, always measure and add the same amount of water to each pail during mixing.

**Application**

AkroFlex Delta may be applied using a hand application method or a machine sprayed method.

**Hand Application Method**

1. Ensure that the receiving surface has been properly prepared according to the Surface Preparation section of this Product Data Sheet.
2. Apply a uniform coat of the desired AkroFlex Delta Finish, no thicker than the largest aggregate, to the substrate.
3. Immediately following the applicator, use a plastic float or stainless steel trowel in a consistent motion to obtain the desired finish.

**Machine Sprayed Method**

1. Add desired amount of mixed material to sprayer.
2. Begin spraying material onto the receiving surface. Starting at a corner and not stopping until the opposite corner is reached. Avoid puddling.
3. To ensure consistent color, a uniform thickness must be maintained during the application process.
4. A true dash finish usually requires 2 to 3 coats.

**Drying**

Drying time may vary due to climatic conditions. Drying should occur within 24 hours at an ambient and surface temperature of 70°F (21°C) and 55%, R.H. All freshly applied material must be protected from inclement weather until fully dry.

**Limitations**

**DO NOT** apply product when the ambient and surface temperature is below 40°F (4°C). Material that is allowed to freeze before fully drying may suffer irreparable damage.

**DO NOT** add any other materials to the mixture of the product without written approval from Omega Products International.

**DO NOT** deviate in the mixing or application procedures contained in this, or any other Omega Product Data Sheets, without written approval from Omega Products International.

**DO NOT** apply AkroFlex Finishes if there are contaminates on the receiving surface. Contaminates may include, but are not limited to, dust, debris, efflorescence, and/or oils.

**DO NOT** paddle mixer that exceeds 500 RPM.

**NOTE:** Failure to follow manufacturer’s written specifications could result in the following, but not limited to spalling, cracking, peeling, chipping, delamination, discoloration, wash off, and overall system failure.

Due to job conditions beyond the control of Omega Products International, we make no warranty as to the acceptance of the final color. The actual integrally colored finish should be applied on a sample section of the project and verified for color accuracy prior to the actual application process.

**Cleaning**

Cleaning may be accomplished with water immediately after use.

**Safety**

Avoid contact with eyes or prolonged contact with skin. Wash thoroughly after handling. In case of eye contact, flush immediately with running water for at least 15 minutes. Consult a physician immediately. Do not take internally. Be sure to provide adequate ventilation in enclosed areas. Use of an approved respirator is recommended.

**KEEP OUT OF REACH OF CHILDREN**

**Disclaimer**

Omega Products International (Manufacturer) makes no warranty of merchantability or fitness for a particular purpose with respect to the product sold herein. The recommendations, suggestions, statements and technical data are based on the best knowledge available to Manufacturer and are given for informational purposes only and without any responsibility for their use. It is expressly understood and agreed, as a condition of the use of this product, that the buyer’s sole and exclusive remedy for any claimed defective product against Manufacturer shall be the replacement of products actually proven to be defective. Handling and use of the products are beyond the control of Manufacturer; therefore, no warranty is made, expressed or implied, as to the results obtained from the use of the product or against any claims for infringement of patents resulting from use of the product. Under no circumstances shall Manufacturer be liable for incidental or consequential damages arising out of the use or the improper application of the product. Before applying the product, the user shall determine the suitability of the product for his/her independent use, assuming all risks and liability whatsoever in connection therewith. This writing constitutes a complete and exclusive statement of the understanding between Manufacturer and Buyer.

**Claims**

Any Claimant shall notify Manufacturer immediately in writing of any alleged defect in the material. Claimant will provide Manufacturer with a reasonable and exclusive opportunity to investigate and test for the alleged defect. For any claim that is not valid Claimant agrees to pay Omega’s reasonable charges, including travel and labor associated with investigation of such claim.
