Omega RapidPrime is formulated for use as a priming agent under all Omega textured finishes, coatings, and similar products to promote bond strength, color consistency, and uniform suction, while increasing water-resistance and finish coverage. It offers excellent efflorescence and alkali resistance on cement-based surfaces with a pH up to 13, such as new stucco, concrete, and masonry. With its high alkali resistance, RapidPrime can be applied without having to wait for the cement-based substrate to drop in pH, thus saving time and money.

Available in standard RapidPrime that has a smooth texture and RapidPrime Sanded that has a fine sand texture.

### Features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>High pH Resistant</td>
<td>Can be applied over new cement-based substrates without extended curing; allowing a more rapid project schedule</td>
</tr>
<tr>
<td>VOC Compliant</td>
<td>Low odor and toxicity</td>
</tr>
<tr>
<td>Vapor Permeable</td>
<td>Allows the wall to breath</td>
</tr>
<tr>
<td>Water Resistant</td>
<td>Reduces the likelihood of efflorescence</td>
</tr>
<tr>
<td>Improves Finish Performance</td>
<td>Increase finish workability, bond, color consistency, and coverage</td>
</tr>
</tbody>
</table>

### Basic Uses

Omega RapidPrime is formulated for use as an interior or exterior priming agent.

**NOTE:** Not for use in an EIF System.

### Area of Use

Omega RapidPrime may be applied to the following substrates:

1. Omega base coats
2. One coat stucco
3. Brown coat
4. Stucco
5. CMU/poured-in-place and/or tilt-up concrete/masonry
6. Drywall/gypsum sheathing
Application Instructions

Surface Preparation
All surfaces to receive application must be clean and free of debris, dust, efflorescence, grease, oils, curing agents, cleaning solutions, and any other agent that may inhibit proper bond. Repair all cracks with the appropriate patching material for the existing substrate. Painted or glossy surfaces must be roughened to ensure a proper bond. Cement-based substrates should be adequately cured, which typically takes a minimum of 7 days for stucco or masonry and 14 days for concrete.

Mixing
1. Omega RapidPrime must be mixed thoroughly, immediately prior to use with a Jiffler-type mixer. If colored primer is required, see the Omega Color Bottle System for color mixing instructions; JifflerPrime requires two color bottles per pail.
2. For application with a sprayer, dilute the Omega RapidPrime with 8oz of clean, potable water.

Application
Omega RapidPrime may be applied with a brush, roller, or sprayer. Avoid puddling.
1. Ensure that the receiving surface has been properly prepared according to the Surface Preparation section of this Product Data Sheet.
2. Apply the Omega RapidPrime to the substrate.
3. If spraying, be sure to strain and use in an appropriate spraying apparatus.

Drying
drying time may vary due to climatic conditions, but should be approximately 1 hour to touch and 4 hours to recoat at an ambient and surface temperature of 70°F (21°C) and 55% R.H. Variations in ambient and surface temperature and humidity may prolong drying time. All freshly applied material must be protected by an approved protective system from inclement weather until fully dry. It is the responsibility of the applicator to determine if the product is fully cured and/or dry prior to exposing it to rain, snow, dew, and/or any other inclement weather condition that may be detrimental to the product.

Limitations
DO NOT apply product when the ambient and surface temperature is below 40°F (4°C). The ambient and surface temperature must maintain the above requirements until fully dry (See DRYING). Material that is allowed to freeze may suffer irreparable damage. Protect all work from inclement weather with an approved protective system until fully dry.
DO NOT add any other materials to the mixture of the product without written approval from Omega Products International.
DO NOT deviate in the mixing or application procedures contained in this, or any other Product Data Sheets, without written approval from Omega Products International.
DO NOT apply Omega RapidPrime if there are combustible products or combustible operations in the immediate area.
DO NOT apply Omega RapidPrime with an airless sprayer.
DO NOT apply Omega RapidPrime to a wet surface.
DO NOT use a Jiffler-type mixer that exceeds 500 RPM.
DO NOT leave Omega RapidPrime in its applied state (finish coat) required.

Cleaning
Cleaning may be accomplished with water immediately after use.

Safety
Avoid contact with eyes or prolonged contact with skin. Wash thoroughly after handling. In case of eye contact, flush immediately with running water for at least 15 minutes. Consult a physician immediately. Do not take internally. Be sure to provide adequate ventilation in enclosed areas. Use of an approved respirator is recommended.

KEEP OUT OF REACH OF CHILDREN

Disclaimer
Omega Products International (Manufacturer) MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE PRODUCT(S) SOLD HEREIN. The recommendations, suggestions, statements and technical data are based on the best knowledge available to Manufacturer and are given for informational purposes only and without any responsibility for their use. It is expressly understood and agreed, as a condition of the use of this product, that the buyer’s sole and exclusive remedy for any claimed defective product against Manufacturer shall be the replacement of products actually proven to be defective. Handling and use of the products are beyond the control of Manufacturer; therefore, no warranty is made, expressed or implied, as to the results obtained from the use of the product or agent. Claims for infringement of patents resulting from use of the product. Under no circumstances shall Manufacturer be liable for incidental or consequential damages arising out of the use or the improper application of the product. Before applying the product, the user shall determine the suitability of the product for his/her independent use, assuming all risks and liability whatsoever in connection therewith. This writing constitutes a complete and exclusive statement of the understanding between Manufacturer and Buyer.

Claims
Any Claimant shall notify Manufacturer immediately in writing of any alleged defect in the material. Claimant will provide Manufacturer with a reasonable and exclusive opportunity to investigate and test for the alleged defect. For any claim that is not valid, Claimant agrees to pay Manufacturer’s reasonable charges, including travel and labor associated with investigation of such claim.

Technical Assistance
Technical assistance and information is available by calling Omega Products International at (800) 600-6634 or FAX (951) 520-2594 or by e-mail at info@omega-products.com.

Warranty
The following is made in lieu of all expressed and implied rights, warranties and conditions, statutory or otherwise. The manufacturer’s only obligation shall be to replace such quantity of products proven to be defective within one year following the date of manufacture, provided that the alleged defective product is returned prepaid to the manufacturer’s plant and is accompanied with proof of purchase and batch number.
