3. Masonry or brick walls
4. Concrete walls
5. Siding

Application Instructions

STUCCO CLEANER

Application

Test product on an inconspicuous area before applying to entire surface.

1. Attach garden hose to the sprayer with the sprayer valve in the "OFF" position.
2. Turn on water.
3. Turn sprayer valve to "WATER" position. Saturate the wall beginning at the bottom and working to the top. This will help prevent dirt residue from staining lower portions of the wall during cleaning.
4. After wetting the surface turn sprayer valve to "ON" position and spray the surface from the top down.
5. Allow cleaner to penetrate for 5-10 minutes. Do not allow surface to dry. It may be necessary to scrub heavy soiled or mildewed surfaces with a soft bristle brush. A secondary application may be needed. Do not use excessive pressure or abrasive methods while cleaning. It is typical for some stucco particles to be dislodged during the cleaning process.
6. Turn sprayer valve to "WATER" position and thoroughly rinse treated surface from the top down.
