**StyroBond Adhesive** is a non-cementitious, 100% acrylic adhesive designed to bond EPS foam to various approved substrates including wood-based sheathing. It does not require the addition of portland cement, which reduces the labor costs during application.

**Basic Uses**

StyroBond Adhesive is used to adhere Expanded Polystyrene (EPS) Insulation Board to various porous approved substrates including wood substrates in AkroFlex EIF Systems.

**NOTE:** Not for use in adhering EPS to EPS.

**Area of Use**

StyroBond Adhesive may be applied to the following substrates as a component of an AkroFlex EIF System:

1. Wood-based or OSB sheathing
2. Paper-faced gypsum sheathing
3. Fiber glass mat-faced gypsum sheathing
4. Cement backer board
5. Masonry
6. Poured-in-place and/or tilt-up concrete
7. Other approved cementitious substrates
Application Instructions

Surface Preparation

All surfaces to receive application must be structurally sound, clean and free of debris, dirt, dust, efflorescence, grease, oils, curing agents, and cleaning solutions. Ensure that all surfaces are smooth and free of any irregularities. Repair cracks with the appropriate patching material for the existing substrate as needed.

Mixing

StyroBond Adhesive must be mixed thoroughly, immediately prior to use, with a Jiffy-type mixer. If the consistency is thicker than desired, up to 8oz of clean, potable water may be added.

Application

See the appropriate AkroFlex EIFS ICC-ES Evaluation Report for additional application instructions and requirements.
1. Apply the StyroBond Adhesive to the back of the EPS Insulation Board with an approved notched trowel.
2. Apply the StyroBond Adhesive side of the insulation board to the substrate.
3. Ensure that the entire piece of insulation board has been firmly attached to the substrate.
4. Allow the StyroBond Adhesive to set for a minimum of 24 hours prior to working on the insulation board.

Drying

Drying time may vary due to climatic conditions. Drying should occur within 24 hours at an ambient and surface temperature of 70°F (21°C) and 55% R.H. All freshly applied material must be protected from inclement weather until fully dry.

Limitations

DO NOT apply product when the ambient and surface temperature is below 40°F (4°C). Material that is allowed to freeze before fully drying may suffer irreparable damage.

DO NOT add any other materials to the mixture of the product without written approval from Omega Products International.

DO NOT deviate in the mixing or application procedures contained in this, or any other Product Data Sheets, without written approval from Omega Products International.

DO NOT apply StyroBond Adhesive if there are contaminants on the receiving surface. Contaminates may include, but are not limited to, dust, debris, efflorescence, and/or oils.

DO NOT apply StyroBond Adhesive to OSB or plywood sheathing with a moisture content higher than the manufacturer’s recommendation.

DO NOT add any more water than prescribed.

DO NOT use a paddle mixer that exceeds 500 RPM.

NOTE: Failure to follow manufacturer’s written specifications could result in the following, but not limited to spalling, cracking, peeling, chipping, delamination, discoloration, wash off, and overall system failure.

Cleaning

Cleaning may be accomplished with water immediately after use.

Safety

Avoid contact with eyes or prolonged contact with skin. Wash thoroughly after handling. In case of eye contact, flush immediately with running water for at least 15 minutes. Consult a physician immediately. Do not take internally. Be sure to provide adequate ventilation in enclosed areas. Use of an approved respirator is recommended.

KEEP OUT OF REACH OF CHILDREN

Disclaimer

Omega Products International (Manufacturer)
MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE PRODUCT(S) SOLD HEREBIN. The recommendations, suggestions, statements and technical data are based on the best knowledge available to Manufacturer and are given for informational purposes ONLY and without any responsibility for their use. It is expressly understood and agreed, as a condition of the use of this product, that the buyer’s sole and exclusive remedy for any claimed defective product against Manufacturer shall determine the suitability of the product for its/her independent use, assuming all risks and liability whatsoever in connection therewith.
